How to play this game

--Firstly game is opened by user

--User click the "START" button and game is started

--First player of the game is user so user must enter a guess for finding the computer's

game

--When user enter the his guess, computer gives hint for user

Hint:

 When user's guess number has same numbers at same digits with computer's
number then computer gives "+" values , if it same numbers at different digits then
computer gives "–" values.

--After user's guess, turn is computer and computer guess a number for finding the user's
number

--And user gives a hint according to computer's guess.

--Finally if user's hint is +4-0, then commputer is won the game or if computer's hint is +4-0,
then user is won the game.
